

# FELIX BRUNNER, PHD

# DATA SCIENTIST

## PROFILE SUMMARY

Data science and machine learning specialist with 3+ years of experience in delivering commercial and research projects. Main expertise lies in developing **predictive models**, data analytics solutions, and implementing AI-driven applications in Python to drive actionable insights and business value.

DATA ANALYTICS

**PREDICTIVE** MODELING

A.I. **APPLICATIONS** 

## PROFESSIONAL EXPERIENCE

### Machine Learning Scientist

dida Machine Learning

05/2021 - 09/2023

- o Led deep learning research in computer vision and time series, improving model accuracy and performance for real-world applications.
- o Implemented machine learning solutions in client projects, automating processes, increasing operational efficiency, and enabling data-driven decision-making.
- **Developed data pipelines** for model deployment into live production.
- o Conceptualized and prototyped large language models (LLMs) for questionanswering systems, automating workflows and enhancing NLP capabilities.
- Managed a five-person project team, coordinating tasks and ensuring timely delivery of milestones and successful project outcomes.
- o Prepared in-depth analyses and visualizations of large-scale unstructured data, delivering actionable insights through data-driven storytelling.

#### Teaching Assistant

Universidade Nova de Lisboa

09/2017 - 02/2022

- Assisted in teaching and grading graduate-level courses on financial data analysis, mentoring 300+ students on complex data-driven methodologies.
- o Developed course materials, assignments, and exams, promoting applications of financial modeling, statistical analysis, and data visualization techniques.

# **EDUCATION & MORE**

#### PhD, Economics

Nova SBE, New University of Lisbon

05/2024

- o Conducted research in applied econometrics and data analysis, with a focus on the estimation of network graphs from large datasets with machine learning.
- o Utilized data science tools such as Python, SQL, and Matlab to implement complex models, analyze large-scale datasets, and make significant contributions to the field.
- Successfully defended dissertation in May 2024 with distinction and honors.

#### **Data Science Bootcamp**

Lisbon Data Science Academy

07/2020

- o Completed a 9-month program in NLP, recommender systems, model deployment and more with hands-on projects in python.
- o Competed in hackathons and weekend sprints, applying advanced machine learning techniques in collaborative environments.

#### Career break

Parenting and PhD completion

2024

o Took a planned career break to be a family man while completing my PhD and enhancing my skills in data science, software development and freelance business. Berlin, Germany

## CORE COMPETENCIES

#### DATA ANALYTICS

- O time series
- O pandas
- O numpy / scipy
- O matplotlib
- O causal inference
- O econometrics / statistics
- O text mining / NLP
- **o** SQL

#### PREDICTIVE MODELING

- O machine learning
- O deep learning / neural networks
- O PyTorch / TensorFlow
- O scikit-learn
- O huggingface
- O forecasting
- O computer vision
- feature engineering

#### A.I. SOFTWARE **ENGINEERING**

- O git/CI/CD
- O linux / bash / CLI
- O docker
- O langchain / LLMs
- O FastAPI
- O MLFLow

# OTHER SKILLS

#### PROGRAMMING & TOOLS

- O python
- O jupyter notebooks
- O VS Code
- O SQL
- **O** MATLAB
- OR
- O Spreadsheets / Excel / VBA
- O MS Office / Google Suite

#### **SOFT SKILLS**

- O proactive problem-solving
- O creative / innovation-driven • stakeholder communication
- O adaptability / continuous
- learning
- project management / organization

#### LANGUAGES

- O English Full working proficiency
- O German Native proficiency
- O Portuguese Intermediary
- O French Intermediary

# FELIX BRUNNER, PHD

More details and linked materials about the listed projects are available at www.felixbrunner.github.io/projects.

## REFERENCE PROJECTS

#### Visual Machine Status Detection in Industrial 3D Printing

Machine Learning Engineer / Project Manager

Manufacturing, Computer Vision

09/2023

- Led project management in a five-person team, ensuring smooth collaboration, preparing project reports, and delivering key stakeholder presentations.
- o Guided data collection and pre-processing of infrared image data from production machines.
- Designed and implemented a custom annotation interface for efficient labeling of image datasets.
- o Developed a deep learning model using convolutional neural networks (CNN) to detect machine pollution.
- o Implemented data augmentation techniques to improve model performance and generalization across machines.
- Deployed the model via a containerized API using Docker and FastAPI, enabling integration into live production.
- **Result:** Supplied a **real-time monitoring system** that automatically detected irregularities, reducing manual interventions and improving production efficiency.

**Technologies:** Python, PyTorch, CNNs, Docker, Git, OpenCV, FastAPI, PyTorch Lightning, ipywidgets, ResNet. **Links:** <u>Article</u> on custom annotation tool with code <u>repository</u>.

#### **Quality Prediction Based on Sensor Time Series Recordings**

Machine Learning Researcher / Project Manager

Manufacturing, Time Series

09/2023

- Analyzed and visualized high-frequency sensor data to identify patterns related to product quality.
- o Integrated data from multiple sources, processing, filtering, cleaning, and combining datasets for consistency.
- **Designed data pipelines and modeling approaches** to automate data preparation and streamline data modeling.
- **Developed a quality prediction system** using advanced machine learning techniques, testing algorithms from traditional statistical models to cutting-edge deep neural networks.
- Conducted experiments with explainable AI to derive actionable insights for process engineers.
- o **Result:** Provided **analytic insights for production optimization**, empowering process engineers to make informed adjustments, ultimately improving product consistency and reducing defects.

**Technologies:** Python, PyTorch, CNNs, ROCKET, Time Series Classification, Data Wrangling, Git, Explainable AI, matplotlib, numpy.

Links: Article series (#1, #2, #3) on the refined ROCKET model with code repository.

#### **Automated Question Answering via Document Retrieval**

Data Scientist / AI Engineer

IT Services, NLP

02/2023

- o Developed an extractive QA demo using NLP models to automate question answering based on internal documents.
- o Created a proof-of-concept for semantic search and automatic document retrieval, improving search accuracy.
- o Expanded the retrieval pipeline with more documents, enabling generative QA with large language models (LLMs).
- Updated developers on the latest NLP advancements and applications, ensuring cutting-edge technology adoption.
- Result: Deployed a responsive chatbot for document-based QA, reducing manual search times and streamlining employee access to information.

**Technologies:** Huggingface Transformers, Haystack, LLMs, BERT, Semantic Search, Document Retrieval, Git, BeautifulSoup4, web scraping.

### **Estimation and Analysis of Variance Spillover Networks**

Data Scientist / Researcher

Academia, Time Series Forecasting

11/2023

- o **Explored and evaluated various statistical learning algorithms for multivariate forecasting**, identifying optimal methods for large-scale datasets.
- Acquired data from SQL databases and set up an automated pre-processing pipeline for efficient data handling.
- o Implemented object-oriented code for running cross-validated algorithms to estimate variance spillover networks.
- Conducted rigorous statistical and econometric analyses, producing valuable insights into variance spillovers in economic and financial networks.
- Authored research papers targeting high-impact journals, presenting novel methodology and findings.
- **Result:** Published a **well-received paper** in *Quantitative Economics*, with follow-up research papers under review, contributing significantly to the field of econometrics and financial research.

**Technologies:** Python, pandas, numpy, scikit-learn, PostgreSQL, glmnet, Vector Auto-Regression, Multivariate Time Series Forecasting, Networkx, MS Azure.

**Links:** Published <u>paper</u> with code <u>repository</u>.
